

PILOT-PACK APPLICATION

Overview

The NDSR Pilot-Pack licensing option is available to facilitate use of the NDSR software in pilot/feasibility studies. Offered at a steeply discounted price, NDSR Pilot-Pack may be used only for the pilot/feasibility study for which it is approved. With this licensing option, investigators may use the NDSR software up to two years for data entry. The resulting output files are extensive, tab-delimited text files that may be analyzed using your choice of statistical analysis software. At the end of the study period, the cost of the NDSR Pilot-Pack may be credited towards the purchase of a NDSR Research license.

Support Services

Core support services provided include installation assistance, answers to your questions, consultation time with NCC User Support Representatives and up to ten missing food resolutions.

Eligibility Criteria

The NDSR Pilot-Pack licensing option is limited to use for preliminary studies conducted to serve as the basis for a larger (e.g., R01) study. Additional eligibility criteria:

1. The study must be two-years in length or less
2. The annual study budget must be equal to or less than \$100,000 in direct costs

Application Process

Applicants should review the NDSR Pilot-Pack End User Software License Agreement and complete an application form. Send these to NCC (see contact information below) so that eligibility for this licensing option may be determined. A response regarding approval will be provided within two weeks.

Pricing

Initial copy - \$1,900

Each additional copy - \$1,175

Please Send Completed Application To:
Nutrition Coordinating Center (NCC)
University of Minnesota
Division of Epidemiology and Community Health
1300 South Second Street, Suite 300
Minneapolis, MN 55454-1087
