Price List (Effective July 1, 2022)

The Nutrition Coordinating Center (NCC) is a service organization at the University of Minnesota that developed and maintains Nutrition Data System for Research (NDSR). Income derived from NDSR licensing and support is used to update the program. With each new NDSR version usability is improved, and updates are made to keep current with technological changes. The food and nutrient database that supports NDSR is also updated to reflect the constantly changing food marketplace and the availability of improved food composition data.

Software Licensing:

Initial Copy

+ Additional Copies

Nutrition Data System for Research (NDSR)

A Windows-based dietary analysis program designed for the collection and analyses of 24-hour dietary recalls, food records, menus, and recipes. Initial cost includes the first year of support.

\$6,350.00

\$4,120.00/each
