

Appendix 22

Sources of Food and Nutrient Data

The following list identifies the sources of data used by the Nutrition Coordinating Center (NCC) at the University of Minnesota for updating and expanding the NCC Food and Nutrient Database. Based on the type of information each source provides, the list is divided into three categories: sources of nutrient values/data, sources of food weights, yields and portion sizes, and sources of ingredient information for recipes and manufactured products. Each category is further divided based on type of publication. A list of journals used most frequently by NCC database scientists for database maintenance is also included.

Nutrient Values/Data

USDA Publications

The USDA Handbook 8 and its revisions listed below have been replaced by the online versions of the USDA National Nutrient Database for Standard Reference (SR). Much of the nutrient data that appears in the USDA provisional tables prior to 2002 also have been incorporated into the SR database.

- Composition of Foods--Raw, Processed, Prepared. Agriculture Handbook No. 8. 1963.

Agriculture Handbook No. 8 Revisions:

- 8-1 Dairy and Egg Products. 1976.
- 8-2 Spices and Herbs. 1977.
- 8-3 Baby Foods. 1978.
- 8-4 Fats and Oils. 1979.
- 8-5 Poultry Products. 1979.
- 8-6 Soups, Sauces and Gravies. 1980.
- 8-7 Sausages and Luncheon Meats. 1980.
- 8-8 Breakfast Cereals. 1982.
- 8-9 Fruits and Fruit Juices. 1982.
- 8-10 Pork Products. 1983. (Revised). 1992.
- 8-11 Vegetables and Vegetable Products. 1984.
- 8-12 Nut and Seed Products. 1984.
- 8-13 Beef Products. (Revised). 1990.
- 8-14 Beverages. 1986.
- 8-15 Finfish and Shellfish Products. 1987.
- 8-16 Legumes and Legume Products. 1986.
- 8-17 Lamb, Veal and Game Products. 1989.
- 8-18 Baked Products. 1992.
- 8-19 Snacks and Sweets. 1991.
- 8-20 Cereal Grains and Pasta. 1989.
- 8-21 Fast Foods. 1988.
- 1989 Supplement
- 1990 Supplement
- 1991 Supplement
- 1992 Supplement

Indices

Many other journals occasionally contain information relevant to nutrient databases. These journals can be located using the following indices:

- Agricola Database
- Medline Database
- PubMed
- Food Science and Technology Abstracts
- Applied Science and Technology Abstracts

Manufacturers' Information

Nutrient information is available from many food manufacturers. Since product formulations may be changed periodically and new products may be introduced, manufacturers' nutrient data are obtained either by accessing their websites or by contacting them directly for updated information. Major grocers' websites which provide manufacturers' nutrient label information are also used when manufacturers' nutrient information is not readily available.
